

PORTFOLIO OF SOLUTIONS

EAB POWER ENGINEERING LTD CO.KG

History of the Company

EAB - ELEKTRO-ANLAGEN-BAU, HANS KOEPPPEL ENGINEERING was founded in 1971 as individual entrepreneur. The main activities during the first years were:

- **Erection and installation of on and installation of electrical heating systems**
- **Erection and installation of high voltage transformer stations**
- **Erection and installation of high and low voltage power systems**
- **Construction and erection of high and low voltage overhead lines**

The Company was changed 1975 to a limited partnership and the established activities were increased to:

- **Manufacturing of High and Low Voltage Power Systems**
- **Manufacturing of Hospital Equipment (lighting channel 7 ducts)**
- **Erection and installation of Hospital Equipment**
- **Erection and installation of Electronics and Communications**
- **Engineering and design of Control Systems**

In 1979 our export division was established and from this time we already delivered projects to:

- **Nigeria (Lagos and Kaduna)**
- **Libya (Tripoli)**
- **United Arab Emirates (Abu Dhabi)**
- **Kingdom of Saudi Arabia (Riyadh, Jeddah, Dammam, Tabuk etc.)**

In the year 1986 a **Branch Office in Riyadh, Saudi Arabia**, was established. The activities are mainly engineering, supervision for erection of our equipment, testing and commissioning.

Present activities

Our activity in the Middle East is focused on:

- **Medium Voltage Switchgear Systems**
 - Primary Distribution Switchgear
 - Secondary Distribution Switchgear
 - Special Applications Switchgear
 - Retrofit Systems for MV- Switchgear
- **SCADA Systems for MV-Switchgears**

Our company is continually investing in improving the technical know-how of its staff as well as in the very last technology.

We successfully initiated industrial co-operation with companies coming from new European Union countries: in particular with SIEMENS, S-ENGINEERING, Co. ZPUE and SCHNEIDER ELECTRIC all located at the EU – Region.

All our product and systems meet requirements of major international standards and specifications – Austrian, German, French, British and American. Design, engineering and manufacturing are organized according to requirements of quality systems **ISO 9001**, **ISO 14001** and **AQAP**.
